

Personal Assignment 2

Tugas 1

1. missing include library

```
#include
```

seharusnya

```
#include <stdio.h>
```

2. wrong pointer arithmetic syntax

```
*(ptr + i) = *(i + ptr - 1) + *(i + ptr - 2);
```

- walaupun bisa dicompile, expression `i + ptr - 1` dan `i + ptr - 2` kurang mudah dipahami
- secara teknis bisa karena urutan operator asosiatif (prioritas eksekusi operator `+/-` dari kiri ke kanan).

Tugas 2
